Friday-Sunday, 27th to 29th of September 2024

Mumbai Hematology Group

Dear Colleague & Student,

We extend a cordial invitation to you for the Mid-term conference of Mumbai Hematology Group (MHG) & Essence of EHA-2024.

This is an in-person (physical) meeting (not hybrid).

This is organized by Mumbai Hematology Group (MHG).

There will be eminent international experts for both classical and malignant hematology covering various advances of practical importance.

Besides, we will have a galaxy of Indian faculty (both national and from Mumbai).

We are sure that once again, you will register in large numbers and benefit from this academic event. Also, this will be an opportunity to meet your colleagues, friends and develop new acquaintances. We look forward to a very vibrant educational event.

Your sincerely,

Dr. Rucha K. Patil
Secretary

Essence of EHA-2024

Friday-Sunday, 27th to 29th of September 2024

International faculty

Dr Neal S. Young, MD

Senior Investigator

Cell Biology Section

Hematology Branch

National Heart, Lung and Blood Institute,

National Institutes of Health

Bethesda, MD, USA

- Dr Neal Young is the Chief of the Hematology Branch of the National Heart, Lung, and Blood Institute.
- He graduated from Harvard College and Johns Hopkins School of Medicine
- He did medical residency at the Massachusetts General Hospital and training in hematology at Washington University in St. Louis.
- Post-doctoral fellowships in biochemistry and molecular biology were at the National Institutes of Health, with Drs. Alan Schechter and Arthur Nienhuis.
- His research interests are bone marrow failure, normal and abnormal hematopoiesis, viral infections of marrow cells, autoimmunity, mechanisms of genomic instability and leukemogenesis.
- His work includes clinical trials in his bone marrow failure clinic in Bethesda (Stem cell stimulation with TPO-RA i.e. eltrombopag, immunosuppression & telomere modulation), basic science in virology, immunology, and cell biology (parvovirus B19, telomerase gene mutations, immune pathogenesis of marrow failure), and epidemiology (the largest population based study of aplastic anemia, in Thailand).
- He has published over 400 original research articles, more than 150 reviews and chapters, and 10 monographs.
- His laboratory has trained dozens of world leaders in hematology.

International faculty

Dr. Steven Horwitz

Lymphoma Service

Memorial Sloan-Kettering Cancer Center

New York, NY, USA

- Endowed Chair, The Nonna's Garden Foundation Chair, With Gratitude to Memorial Sloan Kettering
- Dr. Horwitz is the Associate Attending in the Department of Medicine at Memorial Sloan-Kettering Cancer Center.
- He earned his medical degree at Case Western Reserve University School of Medicine, completed an internship and residency in internal medicine at the University of Rochester/Strong Memorial Hospital, and then completed a fellowship in medical oncology at Stanford University Medical Center.
- Dr. Horwitz is a member of the American Society of Clinical Oncology, the American Society of Hematology, and the International Society of Cutaneous Lymphoma.
- He serves on the Executive Committee of the International T-cell Registry and the Board of Directors of the United States Consortium for Cutaneous Lymphomas.
- He is also a member on the lymphoma committee of the National Comprehensive Cancer Network and has co-authored new guidelines for peripheral T-cell lymphomas, mycosis fungoides/Sézary syndrome, and cutaneous B-cell lymphomas.
- Further, Dr. Horwitz is a reviewer for numerous medical journals including the Journal of Clinical Oncology and Blood and serves on the editorial board of Clinical Lymphoma and Myeloma.
- A longtime friend of the Cutaneous Lymphoma Foundation, Dr. Horwitz is a global leader in both physician and patient education on the topic of cutaneous T-cell lymphoma.
- As a member of the Foundation's Board, he generously donates his time to participate in education, advocacy, and support to the cutaneous lymphoma community.
- His dedication to educating the community is evident through regular participation in Foundation's Patient Educational Forums and contributions to the Forum newsletter.

International faculty

Dr. Claire Harrison

Deputy Chief Medical Officer-Research, Data and Analytics
Professor of Myeloproliferative Neoplasms
Guys and St Thomas' Hospital NHS Foundation Trust
London, UK

- She is an international expert in myeloproliferative neoplasms (MPNs) & she has influenced major advances in MPN including the description of key mutations and designing/leading global clinical trials, including the first JAK inhibitor trial in Europe.
- She is the chief investigator for several other international and national clinical trials.
- She has strong international collaborations in France, Germany, Spain and the USA amongst others.
- She has authored many papers in peer-reviewed journals such as the NEJM and Blood.
- She regularly contributes to British Society of Haematology and the European Haematology Association.
- She is a founder of MPN voice, is an advisory member for the MPN education foundation
- She collaborates with MPN research foundation
- She also works with other patient charities such as Blood Cancer UK and MPN research foundation.
- She is also an advisor to Leukaemia Care and Bloodwise medical charities.
- Her education was in Oxford university, University college Hospital and Great Ormond Street Hospital, London, UK
- She is recipient of Dunhill Medical Fellowship, 2012 and achieved NIHR clinical researcher award in 2017 and 2018
- She has been Tisch visiting professor of Hematology at Mount Sinai, 2012

Essence of EHA-2024

Friday-Sunday, 27th to 29th of September 2024

International faculty

Dr. Jane Apperley, MBChB, MD, FRCP, FRCPath
Professor of Medicine
Chair
Department of Haematology
Hammersmith Hospital
Imperial College
London (UK)

- Professor Jane Apperley is the Chair of the Department of Haematology at the Imperial College and the Chief of Service for Clinical Haematology at the Imperial College Healthcare NHS Trust in London, England.
- She served as the President of both the European Group of Blood and Marrow Transplantation and the British Society of Blood and Marrow Transplantation.
- She also serves on the Advisory Board of the Centre for International Blood and Marrow Transplant Research.
- She qualified in Medicine from the University of Birmingham and after initial specialization in internal medicine she completed specialist training in hematology in Birmingham, London, Cambridge, and Boston.
- Her particular interests are the biology and management of CML, which has led to an extensive experience in stem cell transplantation and to the use of signal transduction inhibitors.
- Her group at the Hammersmith Hospital site has extensive experience in the use of the first- and second-generation TKI's, particularly in the areas of molecular monitoring and mechanisms of drug resistance.
- She has a long-standing interest in the ways in which hematologic diseases and their treatment impact fertility, pregnancy, and fetal outcome.

International faculty

Dr. Valeria Santini

Director, MDS Unit

Associate Professor of Hematology

University of Florence

Department of Experimental and Clinical Medicine

SOD Hematology

AOU Careggi

Florence, Italy

- Dr. Valeria Santini is Director, MDS Unit, Associate Professor of Hematology at the University of Florence Medical School in Florence, Italy, where she received her degree in Medicine and Postgraduate diploma in hematology (cum laude).
- She worked as an EORTC fellow in experimental hematology from 1988 to 1991 at the Dr. den Hoed Kliniek, Erasmus University, Rotterdam.
- In 1999, she worked in the Department of Leukemia at MD Anderson Cancer Center, University of Texas, Houston.
- Her scientific interests and publications are focused on maturation induction and therapeutic targeting of epigenetics modifications, myeloid leukemias and myelodysplastic syndromes.
- At present, she is responsible for the MDS and chronic myeloid leukemia (CML) program of the Hematology Unit at the University of Florence.
- She is a member of European Hematology Association (EHA), MDS Foundation & Italian Society of Experimental Hematology.
- She is a member of the Executive Board of the Italian Society of Hematology and the Medical Advisory Board of the Aplastic Anemia & MDS International Foundation.

Mid-term conference of Mumbai Hematology Group (MHG)

Essence of EHA-2024

Friday-Sunday, 27th to 29th of September 2024

Lectures by international faculty

1. Dr. Neal Young, USA

- a. What causes aplastic anaemia: Etiology and pathophysiology
- b. Long-term outcomes and predictors of clonal evolution and myeloid neoplasia following immunosuppressive therapy in severe aplastic anemia
- c. Hypoplastic MDS vs AA
- d. Somatic mutations in “benign” hematologic diseases & medicine
- e. VEXAS syndrome

2. Dr. Steven Horwitz, USA

- a. BV based therapy for peripheral T-cell lymphoma (ECHELON-2 study)
- b. T-Cell Lymphomas: New Opportunities for Treatment
- c. Cutaneous T-cell lymphomas
- d. Group discussion on T-cell lymphomas

3. Dr. Claire Harrison, The UK

- a. Managing PV beyond Hydroxyurea
- b. Essential thrombocythemia: fine tuning the treatment in 2024
- c. Managing MPNs during pregnancy
- d. Prognosticating myelofibrosis

4. Dr. Jane Apperley, The UK

- a. Toxicities of TKIs
- b. Managing CML after 2nd line of TKI (Asciminib & others)
- c. TFR: When How & Why ?
- d. CML and pregnancy

5. Dr. Valeria Santini, Italy

- a. Management of lower-risk MDS
- b. Luspatercept based treatment of MDS
- c. Non-transplant management of higher-risk MDS
- d. Case discussion session with fellows

First Report of Molecular Characterization of Congenital Dyserythropoietic Anaemia Type I with a CDAN1 gene mutation diagnosed by Next Generation Sequencing panel

Abstract:

Background: Congenital dyserythropoietic anaemias (CDAs) are a rare, heterogeneous group of disorders characterized by ineffective erythropoiesis. CDAI is very rare and caused due to mutations in the CDAN1 or c15orf41 gene. There is no report on the molecular characterization of CDA I in the Indian population. An 8-year-old transfusion-dependent patient was referred for haemolytic anaemia workup. Common causes of congenital haemolytic anaemia were ruled out. A bone marrow aspiration study showed erythroid hyperplasia with mild dyserythropoiesis. Thus, the patient was considered for molecular characterization using next-generation sequencing.

Objective:

Diagnosis of unexplained congenital anaemia using next-generation sequencing.

Method:

Next-generation sequencing panel was used for identification of the disease-causing variant; bioinformatics tools were used to predict pathogenicity of the variant and functional validation was performed by gene expression studies using quantitative real-time PCR.

Results:

Red cell membrane, enzyme, hemoglobinopathy, and autoimmune hemolytic anaemia studies were normal. Bone marrow aspiration study showed erythroid hyperplasia with mild dyserythropoiesis. The patient showed c. 2671C>T, p. Arg891Cys variant in the CDAN1 gene using next-generation sequencing. Bioinformatics tools like SIFT, PolyPhen 2.0 predicted the variant to be damaging and deleterious. The expressions of CDAN1 and c15orf41 genes studied using quantitative real-time PCR were significantly reduced as compared to healthy controls.

Conclusion:

Next-generation sequencing confirmed the diagnosis of CDA I in a patient who underwent excessive investigation earlier. CDA, being clinically similar to other prevalent causes of anaemia, should be kept in mind especially when the common causes have already been ruled out. Further, the use of in-silico tools and gene expression analysis validated the functional impact of this variant.
